

DEFINE PROBLEM STATEMENTS (CUSTOMER PROBLEM STATEMENT TEMPLATE)

Date: 18th July 2026	Project Name: Book a Doctor App	Team Lead: Kilari Ushodaya
Domain: Healthcare	Team Members: Shyam Prasad Mantri, Madhu Hasitha Kondeti, Nanda Kumar Madugula, Mantena Sirisha	

1. Customer Persona & Target Audience:

Patients experiencing illness, working professionals needing scheduled visits, elderly care managers, and Healthcare Providers (Doctors, Clinic Administrators).

2. Problem Description:

Patients currently face significant friction when booking doctor visits. Traditional methods rely on phone calls during restricted clinic hours, long lobby queues (45-90 mins), lack of transparent slot availability, and carrying physical paper medical records. Doctors suffer from inefficient schedule distribution, high appointment no-shows, and lack of pre-consultation medical history.

3. Customer Pains & Impact:

- **Time Wasted:** Excessive waiting in crowded clinic lobbies.
- **Lack of Choice:** Inability to easily filter top-rated specialists by location and availability.
- **Fragmented Records:** Difficulty sharing previous diagnostic tests with new specialists.
- **No-Show Burden:** Forgotten visits due to lack of automated SMS/Email reminders.

4. Proposed Digital Solution & Experience:

The **Book a Doctor App** digitizes the entire appointment lifecycle: 24/7 doctor search, real-time calendar slot reservation, secure pre-consultation file uploading, symptom triage, and automated reminder alerts.
